Summary

Computer Engineering graduate with experience in iOS development, front-end development, and product design. Skilled in SwiftUI, Firebase, React, JavaScript, MVVM architecture, REST APIs, and UI/UX design. Passionate about building intuitive mobile applications and responsive web experiences.

Education

Çukurova University	Adana, Turkey
Bachelor of Computer Engineering	2020 – 2025

Experience

KargoLab	Mersin, Turkey
iOS & Front-End Developer	Nov 2025 – Present

- Developed iOS interfaces using SwiftUI and MVVM architecture.
- Built responsive web interfaces using React, HTML, CSS, and JavaScript.
- Contributed to UX/UI improvements and feature implementation across mobile and web projects.

Eterna Teknoloji	Mersin, Turkey
iOS Developer Intern	Jul 2025 – Sep 2025

- Developed user-focused iOS interfaces using SwiftUI.
- Worked with MVVM and reusable UI components.
- Contributed to code quality, UI improvements, and teamwork in the development process.

Dorasoft	Mersin, Turkey
Software Engineering Intern	Jul 2025 – Aug 2025

- Supported development and debugging of an SQL-based ERP system.
- Helped improve data processing performance.
- Took part in technical communication and problem-solving activities within the team.

Projects

Pluggy (2026) | [App Store](#)

Developed an EV charging station discovery application using SwiftUI. Implemented map-based station search, operator filtering, favorites, and charging point exploration features while focusing on modern UX/UI design, user flows, and mobile usability.

Moodiary (2025) - An iOS app for mood tracking, statistics, and personal goals. Built with SwiftUI and Firebase, featuring mood tracking, statistics, goal management, offline support, and dark mode.

ArtifyAI (2025) - AI-powered iOS application using CoreML and SwiftUI to transform photos into artistic styles with real-time image processing and a simple, intuitive user interface.

TripGo (Teknofest 2023) – Travel discovery application concept focused on local attractions, cultural destinations, and food recommendations.

Technical Skills

Programming Languages: Swift, JavaScript, Python, C++

Technologies & Tools: SwiftUI, Firebase, React, MapKit, HTML, CSS, Git, GitHub, Xcode, VS Code

Concepts: MVVM, REST APIs, JSON, Responsive Design, UI/UX Design, Mobile Architecture
